Make Our Country More Fruitful and Beautiful

MALONEY'S *Direct by Mail*

Fruit Growers and Home Garden Edition for 1943

We are at war—total war. Great sacrifices are now being made, and more will be made before victory is ours.

We, as nurserymen, have a great responsibility in this war. Upon our shoulders has fallen a large part of the job of maintaining civilian morale, and growing trees for fruit growers. This morale is just as important as that of the fighting forces of our nation.

Let's all practice gardening for the pleasure it brings in flower and tree lore, as well as for profitable and patriotic duty of growing fruits and vegetables so essential in this onward march to victory.

This government of ours is urging every home gardener, farmer, and fruit grower to set out more fruit trees and small fruit plants. We all must co-operate again this year in the production of good food so vital to the necessities.

A. E. MALONEY.

Prices are Low for Maloney Plus Quality

We know the quality of our nursery stock because we grow it. We have made the nursery business a lifetime work and thus are able to answer your many questions on what fruit trees to grow and how to landscape the home.

We sell only selected stock grown by our experienced men. True-to-name, Maloney northern grown hardy nursery stock guarantees success.

America's 1943 Gardens

Permanent Improvements Possible With Careful Replanting of Garden Plots

Room provided for fruits, flowers, and vegetables without sacrificing needed outdoor living. CLUTTERED UP LAWNS TO BE ELIMINATED.

American gardens and plots will long bear the mark of changes wrought in them in 1943, which done gradually and wisely, will not only increase their productivity but will enhance their importance to all, make them more complete in which to live, work, and play.

Fruits Plus Flowers Plus Vegetables the New Innovation

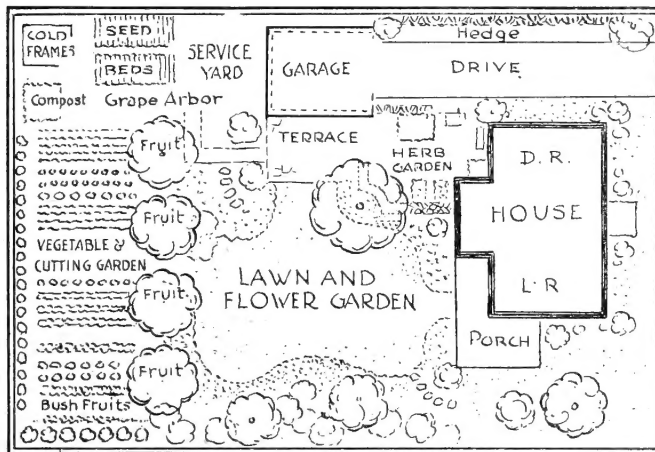

Present day gardeners want to do their best in the growing of fruits and vegetables, but realizing fully the value of health and spirits, orderly ornamental home surroundings, but not to destroy lawns, flowers, shrubs or trees in the process of making space for the food garden.

Garden Space to Include Necessary Fruits and Ornamentals

Instead of an ingenious replanning of your present planting and garden, space can be gained to require a minimum of maintenance, as indicated in the landscape composite.

A Plan to Fit Your Garden Plot

The plan illustrated on this page provides for a modern "Victory Garden" size 75x150. If you have a larger or smaller area to plant be sure and consult our landscape department who will cheerfully submit plans for your approval. See page 39 for full information.

 The block of McIntosh we got of you some 23 years ago will have another big crop. In 1940 they packed out 900 bushels per acre; in 1941, 600 bushels to the acre. This year, if they set as per bloom, they'll go 900 bushels per acre again. The Stayman, Rome and Baldwin are well up in yield but not equal to McIntosh.
 Very truly yours,
 MR. F. N. FAGAN.

Summer Varieties

EARLY MCINTOSH. For home orchard or commercial use, this is the ideal variety to plant. Tree vigorous grower. It is an annual bearer. Fruit same size, quality and flavor as McIntosh Red. Late August.

MELBA. New. Bright crimson, good size, pleasantly flavored. Early August.

RED ASTRACHAN. A good bearer, fruit handsome, large, round, covered with deep crimson. Flesh juicy and tender. Good summer apple. Early August.

YELLOW TRANSPARENT. Tree grows upright, hardy, early bearer. Fruit good size. Skin clear, white to pale yellow in color. Flavor very good. Is an excellent cooking apple known to the housewife everywhere. Early August.

Autumn Varieties

RED GRAVENSTEIN. A new red sport. Differs from the Old Gravenstein only in the solid dark red color of the fruit. Early September.

Winter Varieties

BALDWIN. Large, red, crisp, juicy. Good eating and cooking apple. Tree vigorous and productive. Dec.-March.

CORTLAND. Beautiful red apple, larger than McIntosh. Matures a month later. Excellent quality, keeps late in winter and can be handled and shipped like the hardiest market varieties. Excellent for culinary purposes. Nov.-March.

DELICIOUS, DOUBLE RED. Solid lustrous red without stripes. Fine grained flesh of excellent quality and flavor. A splendid keeper and shipper. Annual bearer, one of the most highly prized winter eating apples. Everyone should have a few trees of this variety. Nov.-April.

JONATHAN. Red, highly flavored. Fine commercial variety. Early bearer. Nov.-March.

KENDALL. New. Dark red. Fruit large. Flavor more sprightly than McIntosh. Oct.-Jan.

MILTON. McIntosh-like but ripens a month before McIntosh. Fruits pinkish red with heavy bloom. Flesh white, tender, crisp, juicy and of McIntosh flavor and aroma. Sept.-Oct.

MCINTOSH RED. Valuable, hardy, attractive apple; good size, nearly covered with red. Flesh white, fine, very tender and refreshing. A good annual bearer, comes into fruiting early. Yields large crops. Oct.-Jan.

NEW ROGERS MCINTOSH. Solid red McIntosh, classed as one of the most valuable new fruit introductions in years. Annual bearer. Fruit is the same size as the common McIntosh, but is not striped. Flesh white, fine grained, very tender, juicy and refreshing. Better quality than common McIntosh and hangs better on tree. Oct.-Jan. (See illustration front cover.)

RED ROME. Rapidly becoming a leading commercial variety having the same shape and texture with equal or better quality than Rome Beauty. Dec.-March.

RED NORTHERN SPY. Red Spy is typical Northern Spy apple except in color. The Red Spy colors a solid bright red without either stripes or splashes. Very popular winter variety. Dec.-March.

R. I. GREENING. Fruit large and handsome, smooth, dark green overspread with yellow. More highly prized for cooking than any other apple. Excellent keeper, tree very heavy yielder. Dec.-May.

ROME BEAUTY. Large, round. Red striped. Dec.-March.

Gentlemen:

Twenty years ago we set some Maloney Trees, a small farm orchard of 120 trees. They have been producing heavy crops of fine fruit for many years, and I have never regretted planting and taking care of this orchard. One year I exhibited at the county fair and put one over on the big boys that had been walking off with all the honors, taking first in all but one of the exhibits. Sorry I can't use any more than just this order. I have recommended your nursery for trees to many people that purchase apples from me. Very truly yours,

J. JENTZSECH.

The superiority of Dansville Grown Fruit Trees is fully demonstrated in these ten young Apple trees. A good root system, straight stems and well-branched specimens cannot help but succeed.

10 Leading Peach Varieties

ELBERTA. Best commercial money-making variety. Fifty per cent of all peaches planted are Elberta. It has proven its ability to adapt itself to varied and climatic soil conditions. Tree hardy, disease resistant, very thrifty and very productive. Fruit large, oval, yellow with red cheek. Flesh yellow, firm, juicy, of high quality. Splendid shipper and keeper. Mid-September freestone.

ELBERTA, EARLY. Yellow, large, good quality. Early September. Freestone.

GOLDEN JUBILEE. Introduced by the New Jersey Experimental Station. It is proving to be a real money maker. Fruit large, yellow; flesh yellow, tender, juicy and sweet. Fruit improves as the tree grows older. Late August. Freestone.

HALE-HAVEN. This exceptionally fine peach is the result of crossing the marvelous J. H. Hale with South Haven. Fruit large, beautiful yellow. Flesh yellow, high quality, good shipper. Its high color even before ripening enables premature picking for distant markets. Tree is hardy strong grower, yields heavy crops. Early September. Freestone.

HALE, J. H. Large, yellow overlaid with carmine. Flesh yellow, fine grained. Late August. Freestone.

SHIPPER'S LATE RED. Popular new variety rather outstanding for the fruit is very large, high color, yellow flesh of unusual quality. Late September. Freestone.

SOUTH HAVEN. This variety is increasing in popularity rapidly. Golden yellow with red blush, juicy and deliciously sweet. Late September. Freestone.

VALIANT. Seedling of Elberta, rapidly increasing in popularity. Fruit large, roundish, oblate, yellow blushed with red; firm, juicy, very good quality. Noteworthy because of earliness and its delectable flavor. Season about September 1st. Freestone.

VEDETTE. Ripens a few days before Valiant and like Valiant it was obtained from an Elberta seed. The tree is productive and the fruit is large, roundish oval, yellow fleshed. Some classify it as superior to its parent, not only in quality but color as well. Late August. Freestone.

FERTILE HALE. New. Yellow with deep carmine blush. A splendid market variety. September 1st. Freestone. Price: 1 yr. large, 4-5 ft., 9/16 in. up, 1-9, 80c; 10-49, 65c; 50-299, 45c. 1 yr. medium, 3-4 ft., 7/16 in. to 9/16 in., 1-9, 65c; 10-49, 55c; 50-299, 40c.

Boysenberry

Price: Select No. 1 plants,
3/16 in. and up, 10 for \$1.20;
25 for \$2.20; 50 for \$4.00;
100 for \$6.75.

This is the berry which has created such a sensation throughout the United States. A tremendous bearer of immense berries, often 1 1/2 to 2 inches long, of the highest quality. No matter whether used fresh or canned, or in pies or jelly, it stands supreme. No other berry has ever been received so enthusiastically or planted so widely. Late July.

Thornless

BOYSENBERRY

Price: Select No. 1 plants, 25c each; 5 for \$1.00;
10 for \$1.85; 25 for \$3.50.

This amazing new berry has the same big, juicy, delicious fruit as the regular Boysenberry. The vines are **absolutely thornless**, making the cultivation of same and picking easy. They can be trained to a trellis or wire. Late July.

THOROBRED BLUEBERRIES

Will Bear Fruit First Year

These giant, cultivated Blueberries are the result of scientific breeding by State Experimental Stations and are far superior to the ordinary wild Blueberries. Two to six bushes in your garden will furnish your family plenty of berries for fresh pies and canning. Highly profitable when grown for market.

Two different varieties should be planted to pollenate.

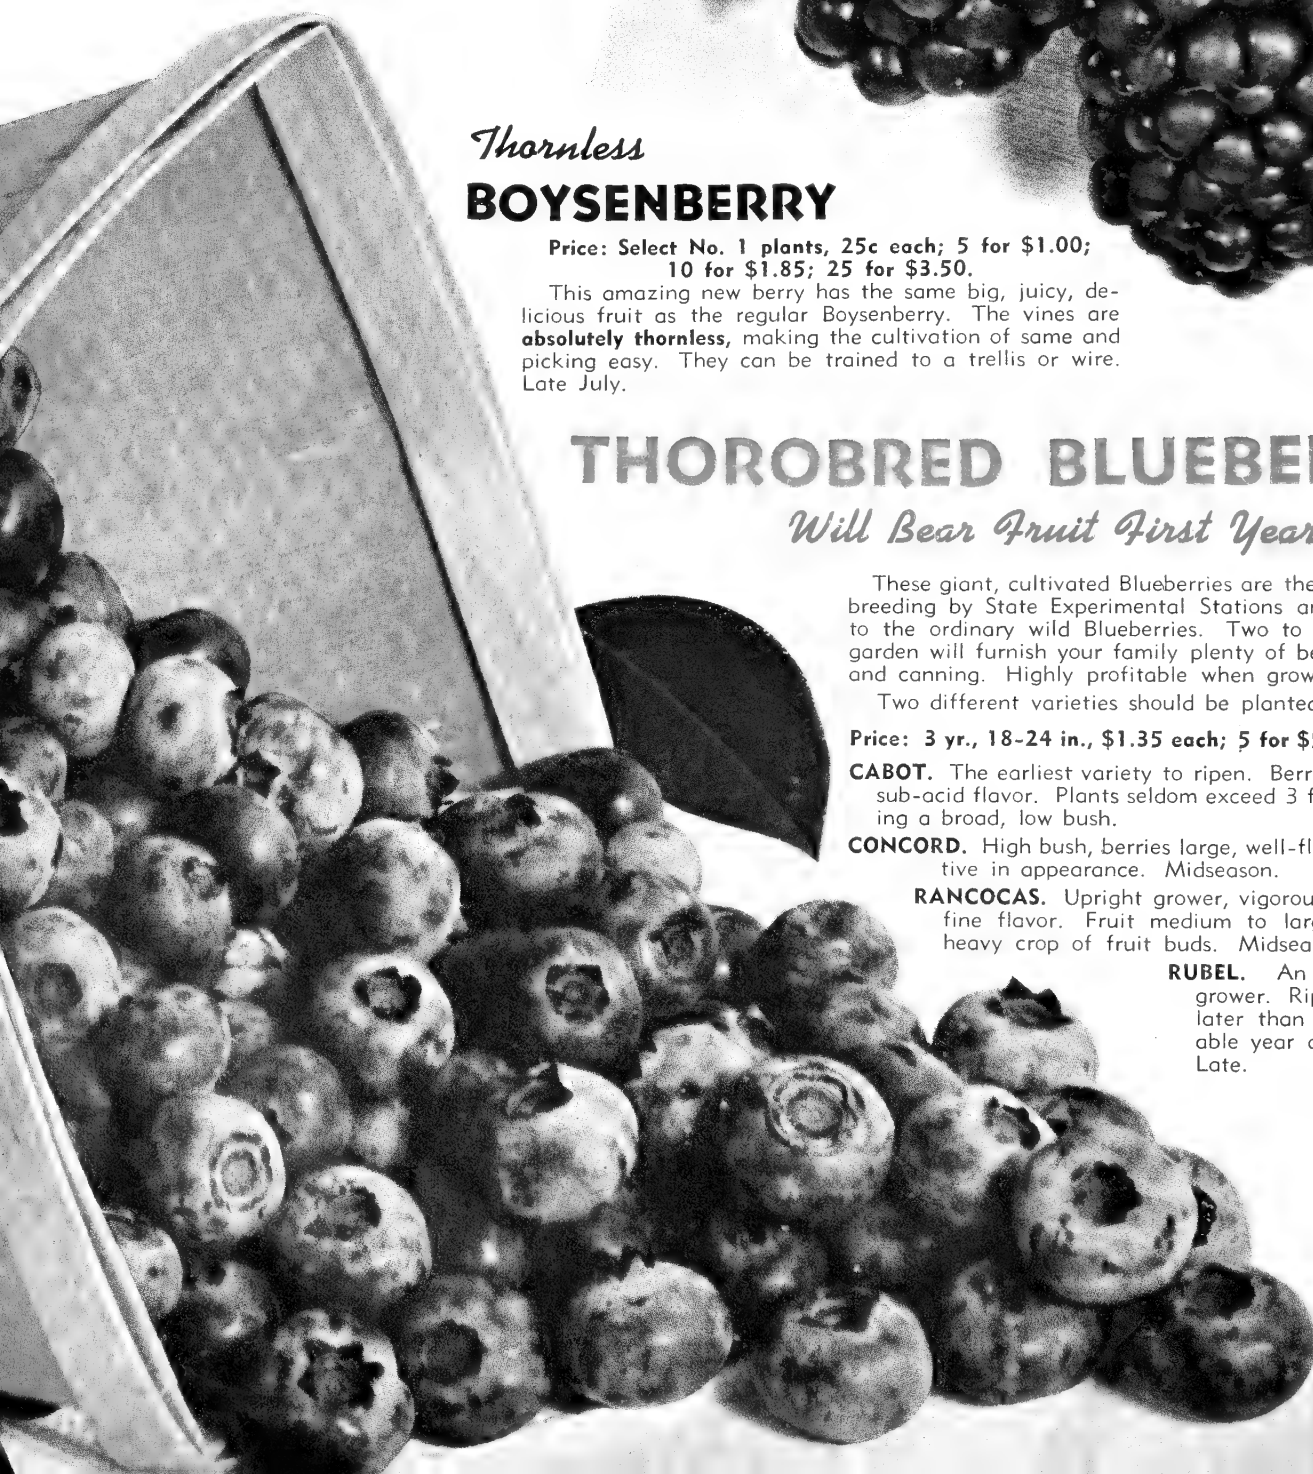

Price: 3 yr., 18-24 in., \$1.35 each; 5 for \$5.65; 10 for \$9.95.

CABOT. The earliest variety to ripen. Berries have a delicious sub-acid flavor. Plants seldom exceed 3 feet in height, making a broad, low bush.

CONCORD. High bush, berries large, well-flavored, and attractive in appearance. Midseason.

RANCOCAS. Upright grower, vigorous, hardy; fruit very fine flavor. Fruit medium to large size. Sets very heavy crop of fruit buds. Midseason.

RUBEL. An upright, vigorous grower. Ripens about 2 weeks later than Cabot. A dependable year after year producer. Late.

HARDY DELICIOUS *Youngberry*

No. 1 PLANTS

Price: 10 for 90c; 25 for \$1.85; 50 for \$3.00.

A new berry! Combines all the best qualities of the raspberry, blackberry, and dewberry, to achieve a rich, spicy flavor that is unsurpassed for tastiness. Youngberries are large, practically seedless, so full of juice they are perfect for jelly, canning or eating fresh. Tremendous bearer. Mid-July.

THORNLESS YOUNGBERRY

No. 1 PLANTS

Price: 5 for \$1.00; 10 for \$1.75; 25 for \$3.50; 50 for \$5.50.

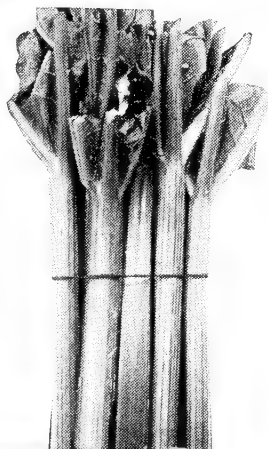

It's thornless, hardy. Ripens early. Bears heavily and most delicious flavor. Ripens two weeks before Thornless Boysenberry. The fruit of this berry is large, a handsome dark wine-red color, sweet, deliciously flavored and practically seedless.

RHUBARB

Price: 2-yr. roots, 3 for 60c; 10 for \$1.50; 50 for \$5.00.

GIANT VICTORIA.

This new variety has giant size stalks, twice the size of ordinary rhubarb; very tender. Fine flavor.

GEM A sweet, deep red, glossy appearing berry of excellent marketing quality. Berries are above average in size, outstanding in firmness—vigorous plants with heavy root system, hardy and **blight-resistant**.

MASTODON The fruit is of very large size and has a good waxy appearance. Produces an abundance of fruit, continuing throughout the summer and fall.

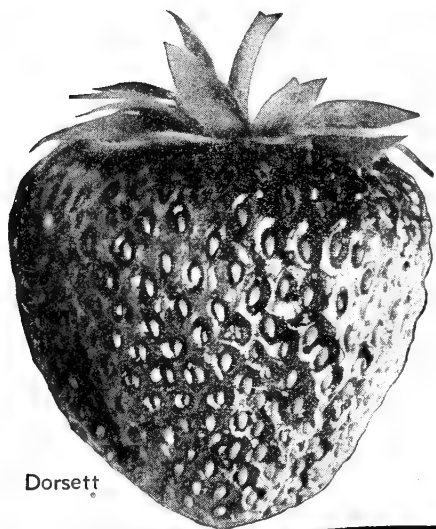

NEW GEMZATA →

The outstanding Everbearer of all time. The Gemzata is an exceptionally heavy producer of large, attractive fruit. It has the firmness of the Gem, making it the leading everbearer for shipping to distant markets. It has proven to thrive in all types of soil, even where all other everbearers fail.

Price: 25 for \$1.60; 50 for \$2.75; 100 for \$4.50.

BEST June-Bearing STRAWBERRIES

Price: Postpaid or Express prepaid, 25 for 90c; 50 for \$1.20; 100 for \$1.80; 500 for \$6.50; 1000 for \$10.50.

Dorsett

CATSKILL. Produces large, strong plants with berries of very large size, equaling Premier in flavor. It's an excellent shipper, bright red in color and firm enough to arrive on the market in excellent condition. Considered almost frost-proof and is an abundant producer. A midseason berry.

DORSETT. Released for introduction by the U. S. Department of Agriculture spring of 1933. Color is bright red. Berries very large; flavor superior to other early berries. Can be classed among the best.

FAIRFAX. Released for introduction by the U. S. Department of Agriculture, spring of 1933. Fruit ripens uniformly along with

Premier; long fruiting season. Quality unexcelled. Berries are very large, bright red color at picking time, turning to dark red. Fairfax should be planted for both home and commercial use.

PREMIER. Perfectly flavored. It is smooth and large; its color is the commanding glossy red which sells on sight. Early.

SENATOR DUNLAP. One of the oldest mid-season varieties. Will grow on all soils under most unfavorable conditions and will do well in localities where late frosts make it impossible to grow other kinds. It is a heavy producer and fruit is of good size, bright red color, firm and glossy. Splendid shipper.

DEWBERRIES

LUCRETIA DEWBERRY

1 YEAR No. 1

AN EXPERT'S STATEMENT ON DWARF FRUIT TREES

So far as we know, Maloney Brothers are the first in this country to offer fruit trees on the improved dwarfing root stock selected by the East Malling Research Station in England, and propagated and introduced by the New York State Experiment Station at Geneva, New York.

The root stocks are superior to the dwarf stocks used in the past because they are pure strains. The performance of varieties on these stocks can, therefore, be accurately forecast.

The most dwarfing stock in the group of Malling types is Malling IX, also known as Jaune de Metz. A semi-dwarfing stock of good character is Malling I, also known as broad-leaved English Paradise.

Sincerely yours,

H. B. TUKEY, Chief in Research.

Growers

Raspberries are profitable, and it is nice to be able to go out and pick a few as you want them. You can plant an acre and get big returns the second year, and from \$600.00 to \$1,000.00 per acre thereafter. Berries require little care, and only reasonably good soil.

PRICES of all varieties (except as noted): 1 yr., No. 1 plants, 25 for \$1.50; 100 for \$4.25; 500 for \$15.00; 1000 for \$27.00.

BRISTOL. One of the best black raspberries. Berries large, firm, glossy, attractive and of excellent quality. Bushes hardy, vigorous and bear very heavy crops. Early July.

CHIEF. New. Berries are dark red; good size, extra firm and hold up a long time after picking. Early July.

COLUMBIAN. Purple. Very large, somewhat conical, rich, juicy; seeds small, bears large crops. Mid-July.

CUMBERLAND. Black. Berries large, firm, glossy and unsurpassed in quality. Perfectly hardy and productive. Early July.

INDIAN SUMMER. Red Everbearing. Season early July through to mid-October. Berries large, roundish, conic, slightly irregular, good in quality. Heavy yielder. **Price: 25 for \$1.75; 100 for \$4.75; 500 for \$17.00; 1000 for \$30.00.**

LATHAM. Red. Large, round, richly brilliant red. A superb success in quality, production and profits. Fruit clings to stems several days after fully ripe. Extremely hardy and mosaic free.

MARCY. Red. Berries very large, long, conic, firm, thick-fleshed; mild flavor and good quality. Bushes tall, vigorous, healthy, bearing quantities of fruit. Early July. **Price: 25 for \$1.75; 100 for \$4.75; 500 for \$17.00; 1000 for \$33.00.**

MORRISON. Black Raspberry. It ripens a little later than Cumberland. The color is an intense, glossy black, so attractive that these huge berries sell on sight. The fruit has almost no seeds, firm texture, yet juicy. In short, this is the most promising new black raspberry. **Price: 20 for \$2.25; 100 for \$6.00; 500 for \$25.00.**

NAPLES. Black. New, hardy, mosaic free, productive Black Raspberry, resistant to disease. Fruit large, firm, attractive and of good quality. Mid-July.

NEWBURGH. Attractive bright red. Fruit very large, firm and does not crumble. Plants vigorous, hardy and practically mosaic free. A splendid home and market variety. Early June.

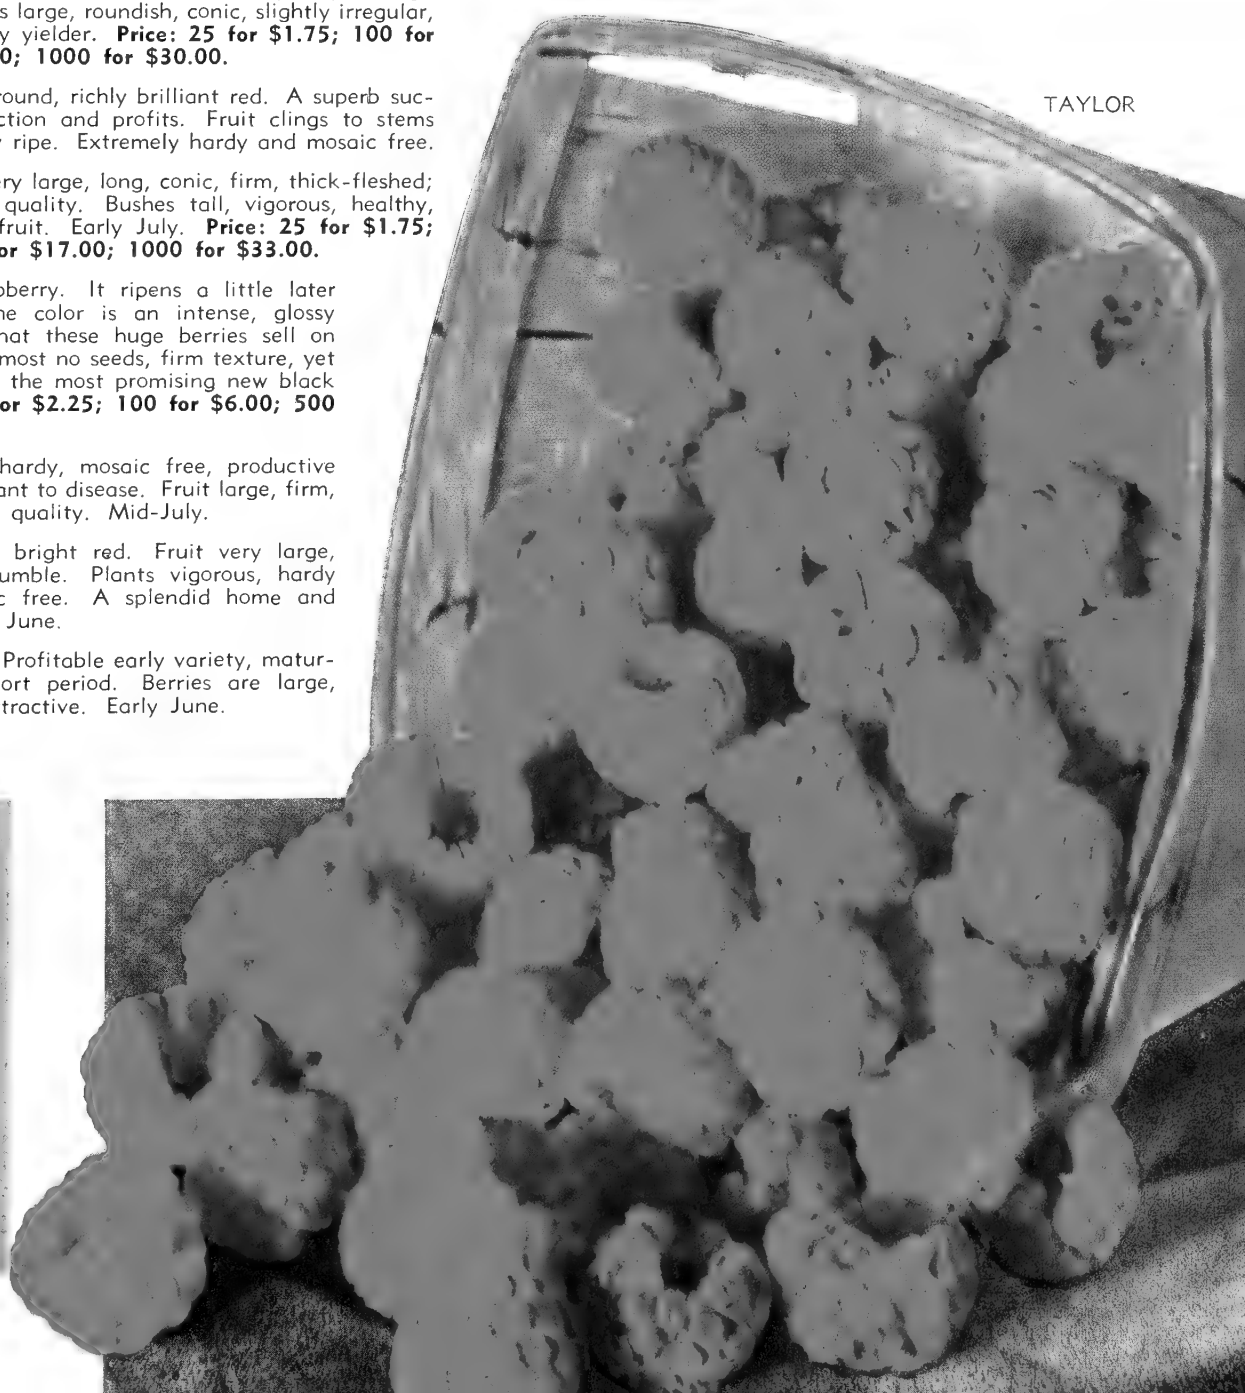

PLUM FARMER. Black. Profitable early variety, maturing entire crop in short period. Berries are large, thick-meated, firm, attractive. Early June.

ST. REGIS. Red Everbearing. One of the best. Berries are very large. Will supply the table with delicious fruit throughout summer. Starts bearing mid-June and continues until frost.

SODUS. Purple. Berries very large, firm, sprightly and good flavor. Plants very vigorous, productive and hardy. Much more resistant to drought than Columbian. Valuable market variety. Mid-July.

TAYLOR. New Red Raspberry from New York Experiment Station. Long conical shape, firm thick flesh, flavor excellent. Larger than Latham and one of the heaviest bearers we have ever seen. Very early July.

FRUITING AGE TREES

Heavy rooted specimens 7 to 8 feet tall—beautifully branched with upright sturdy stems.

All ready to take hold and transplant this fall. The envy of your friends and a source of constant pride and profit to yourself.

These trees are grown to make sure they will be transplanted successfully without set-back to their growing and bearing power. By our method of transplanting in the nursery, heavy fibrous roots are formed, the wood hardened and fruit spurs started. This means you get a tree true-to-name, developed and trained to grow quickly. A tree that is far superior in vigor and fruitfulness to one of unknown quality.
